# TXDHC

Texas Digital Humanities Consortium Lecture
4/10/2014 | 4:00 PM | Great Hall, UH Alumni Center

"Quantitative Anaylsis of Culture"

Dr. Erez Lieberman Aiden

(Rice, Baylor College of Medicine)

In this talk, Aiden will discuss how computational methods can be used to analyze millions of digitized books to draw conclusions about large-scale trends in human culture.

Bio: Dr. Aiden was one of the creators of Google's Ngram Viewer, which has been used hundreds of millions of times by people all over the world. He received the President's Early Career Award in Science and Engineering from Barack Obama. His last three research papers have all appeared on the cover of *Nature* or *Science*.

Sponsored by the UH College of Liberal Arts and Social Sciences.
